Producer Services – From Development to Distribution — We Handle the Heavy Lifting

Behind every great production is a powerhouse of administration, logistics, and strategy. Our Producer Services division exists to manage the full life cycle of a project, from early development through production, post-production, and global licensing. We are the operational backbone that ensures your creative vision is executed with precision, professionalism, and purpose.

Our Core Responsibilities Include:

- **Development Coordination**
Script breakdowns, budget creation, pitch packaging, talent sourcing, and pre-sale strategy.
- **Production Logistics**
Crew hiring, permits, location scouting, equipment coordination, call sheets, union compliance, and on-set supervision.
- **Post-Production Management**
Scheduling, editorial coordination, finishing pipeline oversight, delivery of broadcast or streaming masters, and QC compliance.

- **Licensing & Distribution Support**

Festival submissions, sales agent relations, legal clearances, deliverables for distributors, and rights management.

Why It Matters:

Having the right production administration team in place is essential to keeping a project on time, on budget, and distribution-ready. Our entrepreneurial spirit, combined with deep operational expertise, is what drives projects to completion—even through the most complex challenges.

We've successfully launched productions across the globe. If you're looking for a production partner who knows how to get it done—**contact us**.
